

# Bug Hotel Prototype

## Wendover Men's Shed prototype

Cost is materials only plus voluntary donation

## Lidengate version

Cost is £175

This one is not quite finished in the photo and was manufactured using materials they had to hand. They would purchase some materials if we commissioned more.

The main difference in their design compared to the Lidengate one is that the legs are rectangular rather than round. Round posts would be a challenge to cut in half longitudinally to fit the top section (see drawing overleaf)

Changes to be made if they do more:

- Finer wire mesh
- Detachable legs
- Include pine cones if we want

Detail of round post fitting
