

## Bus Shelter Research

### Existing Shelter on Wendover Road

The existing shelter has a pitched roof and the size measured at the posts is 3.05m x 1.88m with minimal roof overhang.

### Fremantle bust stops

On care home side - 1.6m grass verge available for shelter (shelter 1.46m deep). Level grass.

Opposite side. 1.6m wide pavement that ends at bus stop. Rough grass behind with ground higher than pavement. Also siding out needed.

## New Wooden Bus Shelters

I could only find one manufacturer of wooded shelters similar to ours.

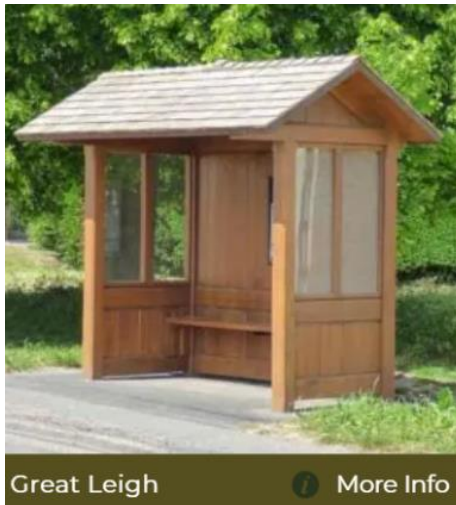

[Bus Shelters Great Leigh - Wooden Bus Shelters | Littlethorpe of Leicester \(bus-shelters.co.uk\)](http://bus-shelters.co.uk)

Cheapest pitched roof shelter is the Great Leigh and the nearest one in appearance to the current shelter is the Sheffield

Shelter	Price	size (posts)	size (roof)	Roof Type	Delivery	Install	Total
Great Leigh	£9,995	2.48m x 1.28m	3.10m x 2.00m	Pitched	£685	£3,000	<b>£13,680</b>
Sheffield	£10,845	2.98m x 1.50m	3.46m x 2.00m	Pitched	£685	£3,000	<b>£14,530</b>

Others are up to £4,000 more.

The installation is an estimate from Littlethorpe of what it would cost to get a third party to remove the old shelter and install the new one. This would be subject to survey.

We can save a bit of money by installing a flat roofed shelter. The cheapest are

Shelter	Price	size (posts)	size (roof)	Roof Type	Delivery	Install	Total
Rettendon	£7,795	2.48m x 1.28m	3.10m x 1.80m	Flat	£685	£3,000	<b>£11,480</b>
Meriden	£7,945	2.48m x 1.28m	3.10m x 1.80m	Flat	£685	£3,000	<b>£11,630</b>

Others range from £1,500 to £3,500 more.

## New Metal Bus Shelters

These are more readily available from a number of suppliers. Most web sites don't give prices but prices are available from <https://www.shelterstore.co.uk/bus-shelters>

For Wendover Road there would still be a charge for delivery, dismantle remove and install. Total costs would therefore be approximately **£6,000 to £9,500**.

For the Fremantle bus stops the dismantle/remove cost is replaced by the cost to lay a paving/concrete/tarmac base. Assume the total costs are therefore approximately the same.

£4,155.84 Inc. VAT

The vandal proof ones have wire mesh rather than polycarbonate which will let the wind through and don't look so nice so we might not want those.

Seats are generally extra and available in various materials.

Most rooves are in clear polycarbonate but in some cases can be replaced with galvanized steel or smoked polycarbonate.

Some shelters are available in different sizes.

### Recommended Metal Shelter

#### **Topaz shelter**

colours

- 2 bay (1.46m x 3.00m). Note that photo is a 3 bay model.
- Plastic sets rather than standard wood – extra £220 but no maintenance.
- Delete timetable panel shown in photo.
- Bolt fixing pack £65

Price excluding delivery/fitting **£3866** Total cost estimated at **£7500** per shelter
